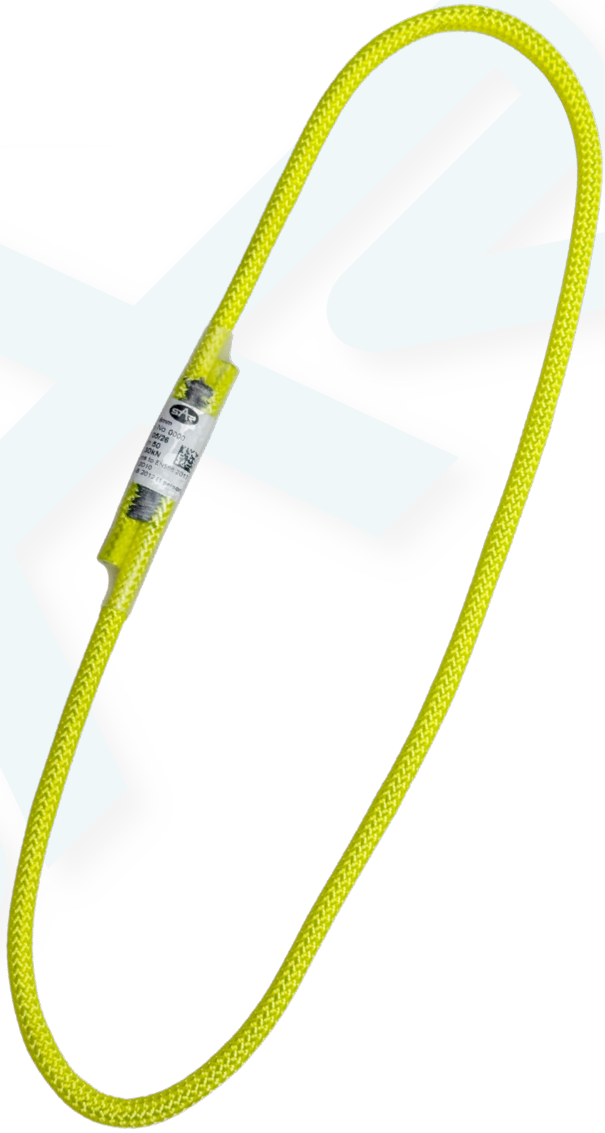
6mm Force Cord Loop

L0045-30L, L0045-60L, L0045-90L & L0045-120L



Our 6mm Force Cord Loop is ideal as a prusik loop, lightweight sling, friction hitch, or for multiple other applications within arboriculture, rope rescue, mountain rescue, water rescue, and other sectors.

Its HMPE core, combined with a durable polyester sheath, provides an exceptionally high strength-to-weight ratio while remaining lightweight, flexible and easy to handle. The construction offers excellent abrasion resistance and low water absorption, making it well suited to demanding operational and outdoor environments.

Features:

- Suitable for multiple applications
- High strength to weight ratio
- Optional EN362 connector fitting available on request
- Must not be used for fall arrest without the addition of a suitable force limiting element

Specs:

- 6mm Diameter Force Cord
- Minimum Strength: 30kN
- Material: HMPE, Polyester
- Length variations available on request

Conforms to:

- EN354:2010, EN566:2017, EN795-B:2012 (1 person)
