

Product Data Sheet

Ground Anchor Strap

RS024

The Ground Anchor Strap is designed to simplify the joining of ground stakes together to make a system. It is fully adjustable up to 2m separation between stakes, and can be supplied with or without a captive connector.

The security and strength provided by any ground anchor is highly dependant on the type of ground in which it is installed. We strongly recommend training on the Ground Anchor Strap.

Specs:

- MBS: 20kN
- Adjustable up to 2m
