

Product Data Sheet

6mm Aramid 6 Cord

RR034

Our 6mm Aramid 6 Cord is a high-performance technical cord designed for demanding applications within rope rescue, mountain rescue, arboriculture, rope access and work at height environments.

Featuring a high-strength Aramid core protected by a durable polyester sheath, it delivers exceptional strength, excellent heat resistance and outstanding durability in a compact 6mm diameter. The polyester sheath provides excellent abrasion resistance and handling characteristics, making it particularly well suited to friction hitches, lightweight anchor systems, progress capture systems, haul systems and technical rescue applications.

A popular choice for users seeking a robust alternative to traditional high-strength technical cords, the combination of an Aramid core and polyester sheath provides excellent performance whilst maintaining long service life in demanding operational environments. Perfect for "skinny rigging". Suitable for friction hitches, prusiks and technical rope systems. Ideal for rope rescue, mountain rescue, arboriculture and rope access use.

Specs:

- Size: 6mm diameter
- Minimum Breaking Strength 29kN
- Core: Aramid
- Sheath: Polyester
- Outer braids: 24
- Weight: 29g per metre
- Colours: Blue
- Standard length up to 200m – Sold only in multiples of 25m
