

Product Data Sheet

6mm Aramid 6 Cord Loop

L0046-30L, L0046-60L, L0046-90L & L0046-120L

Our 6mm Aramid 6 Cord Loop is ideal as a prusik loop, lightweight sling, friction hitch, or for multiple other applications within arboriculture, rope rescue, mountain rescue, water rescue, and other sectors.

Its Aramid core, combined with a durable polyester sheath, provides excellent heat resistance and high strength while maintaining good handling characteristics and durability. The construction is particularly suited to friction hitch applications where increased resistance to heat build-up and glazing is beneficial.

Features:

- Suitable for multiple applications
- High strength to weight ratio
- Optional EN362 connector fitting available on request
- Must not be used for fall arrest without the addition of a suitable force limiting element

Specs:

- 6mm Diameter Aramid 6 Cord
- Minimum Strength: 24kN
- Material: Aramid, Polyester
- Length variations available on request

Conforms to:

- EN354:2010, EN566:2017, EN795-B:2012 (1 person)
