6mm Ocean Vectran Loop

L0047-30L, L0047-60L, L0047-90L & L0047-120L

Our 6mm Ocean Vectran Cord Loop is ideal as a prusik loop, lightweight sling, friction hitch, or for multiple other applications within arboriculture, rope rescue, mountain rescue, water rescue, and other sectors.

Its Vectran core, combined with a highly durable polyester/Aramid sheath, provides an exceptionally high strength-to-weight ratio while maintaining excellent abrasion and heat resistance, handling characteristics and usability in demanding environments.

Features:

- Suitable for multiple applications
- High strength to weight ratio
- Optional EN362 connector fitting available on request
- Must not be used for fall arrest without the addition of a suitable force limiting element

Specs:

- 6mm Diameter Ocean Vectran Cord
- Minimum Strength: 22kN
- Material: Vectran, Polyester/Aramid
- Length variations available on request

Conforms to:

- EN566:2017, EN795-B:2012 (1 person)
