## 8mm Ocean Polyester Loop

L0043-30L, L0043-60L, L0043-90L & L0043-120L

Our 8mm Ocean Polyester Cord Loop is ideal as a prusik loop, lightweight sling, friction hitch, or for multiple other applications within arboriculture, rope rescue, mountain rescue, water rescue, and other sectors.

Its polyester core, combined with a durable Aramid/polyester sheath, provides excellent heat resistance and high strength while maintaining good handling characteristics and durability. The construction is particularly suited to friction hitch applications where increased resistance to heat build-up and glazing is beneficial.

### Features:

- Suitable for multiple applications
- High strength to weight ratio
- Optional EN362 connector fitting available on request
- Must not be used for fall arrest without the addition of a suitable force limiting element

### Specs:

- 8mm Diameter Ocean Polyester Cord
- Minimum Strength: 24kN
- Material: Polyester, Aramid/Polyester
- Length variations available on request

### Conforms to:

- EN354:2010, EN566:2017, EN795-B:2012 (1 person)
