

Product Data Sheet

8mm Resc Tech Eye to Eye Lanyard

L0041-70, L0041-80, L0041-90 & L0041-120

Our 8mm Resc Tech Cord Eye to Eye is ideal as a hitch cord, lightweight sling, friction hitch, or for multiple other applications within arboriculture, rope rescue, mountain rescue, water rescue, and other sectors.

Its UHMWPE/polypropylene core, combined with an ultra durable Technora/polyester sheath, provides excellent heat resistance and high strength while maintaining good handling characteristics and durability. The construction is particularly suited to friction hitch applications where increased resistance to heat build-up and glazing is beneficial.

Features:

- Suitable for multiple applications
- High strength to weight ratio
- Optional EN362 connector fitting available on request
- Must not be used for fall arrest without the addition of a suitable force limiting element

Specs:

- 8mm Diameter Resc Tech Cord
- Minimum Strength: 26kN
- Material: UHMWPE, Technora/Polyester/XLF
- Length variations available on request

Conforms to:

- EN354:2010, EN566:2017, EN795-B:2012 (1 person)
