

Product Data Sheet

8mm Tec Reep Cord

RR031

8mm Tec Reep Cord from Teufelberger is a high-performance 8mm technical cord certified to EN 564:2023. Combining an ultra-lightweight floating UHMWPE core with a durable, abrasion-resistant sheath, it delivers exceptional strength whilst maintaining minimal weight and bulk.

Its extremely low elongation and excellent strength-to-weight ratio make it particularly well suited to lightweight anchor systems, technical rescue applications and specialist rigging. Popular with mountain rescue, wilderness rescue and other high-mobility teams, Tec Reep is ideal where equipment weight and pack size are critical considerations.

Suitable for lightweight anchor systems and technical rigging. Ideal for mountain rescue, wilderness rescue and rope rescue applications
