

Product Data Sheet

8mm Tec Reep Loop

L0042-30L, L0042-60L, L0042-90L & L0042-120L

Our 8mm Tec Reep Cord Loop is ideal as a prusik loop, lightweight sling, friction hitch, or for multiple other applications within arboriculture, rope rescue, mountain rescue, water rescue, and other sectors.

Its UHMWPE core, combined with a ultra durable Technora/polyester/XLF sheath, provides an exceptionally high strength-to-weight ratio while remaining lightweight, flexible and nice to handle. The construction offers excellent abrasion resistance and low water absorption, making it well suited to demanding operational and outdoor environments.

Features:

- Suitable for multiple applications
- High strength to weight ratio
- Optional EN362 connector fitting available on request
- Must not be used for fall arrest without the addition of a suitable force limiting element

Specs:

- 8mm Diameter Tec Reep Cord
- Minimum Strength: 26kN
- Material: UHMWPE, Technora/Polyester/XLF
- Length variations available on request

Conforms to:

- EN354:2010, EN566:2017, EN795-B:2012 (1 person)
